Assistant Application Developer

Professional Synopsis

- Professional Application Developer with more than 6 years' experience in Data analysis, Process Automation & Developing web-based application.
 - Well versed VBA Programming, Python Automation, Python Django Framework, etc.
 - Experience in writing SQL queries, table, views, triggers.
 - Web development project experience using Angular JS, Python-Django.
 - Data analysis project experience using python numpy, pandas, Matplotlib , Scikit-Learn libraries.
-

Skill Set

- Working knowledge of Excel VBA Programming, Process automation, Python web development using Django Framework, Angular JS, Python data analysis.
 - Python 3 Django Framework V2.2 (incl. Frontend - Backend)
 - Django ORM, Queryset and Http Methods (GET/POST/PUT/DELETE) Databases (PostGres, MySQL,)
 - Automation (Selenium) and Celery Task Queue Implementations
 - Jira, Jenkins, Dockerization, APIs, SOLR, and OAuth2 Authentication Bootstrap, HTML, CSS, and JavaScript
 - Basic Knowledge Of Angular JS, AWS.
 - Git, Github (incl. Github actions), GitLab and BitBucket
 - Excellent problem solving and analytical skill
 - Typing speed is 60 WPM
-

EXPERIENCE

➤ Fujitsu Consulting PVT LTD. For Assistant Application Developer. (Mar -2022 to Still Working)

Role in Fujitsu Consulting PVT LTD

- o Working on the Frontend Part of the applications in Django using Python.
- o Developed django view controller and template language to create a user-friendly website interface.
- o Involved in the direct client interaction for the requirement, analysis and designing of the project.

Projects:

Project: 1

Project Name	: Employee Task Management System (ETMS)
Team Size	: 10
Tool/Technologies.	: Python 3, Django framework, CSS, HTML, Bootstrap.
Role	: Front-End developer
Project Synopsis	: ETMS is task tracking system which is use to track employee task details.
Responsibilities	: Developed the frontend using Django

➤ **Futurism Technologies LTD. For Sr MIS Automation Executive. (Mar -2021 to Mar -2022)**

Role in Futurism Technologies PVT LTD.

- Handling Futurism Employee performance management system.(FRMS)
- Update operations in FRMS.
- Analyze employee performance and generate employee performance reports.
- Develop Web based application using Python-Django.
- Developed django view controller and template language to create a user-friendly website interface.
- Working on the Backend Part of the applications in Django using Python to create the APIs and maintaining the databases
- Evolved in different SDLC phases like requirement analysis and designing.

Projects:

Project: 1

Project Name : MRF web application

Team Size : 4

Tool/Technologies. : Python, Python Django Framework, HTML, CSS, SQL.

- **Project Synopsis**

- MRF is web application which is built in Python django framework using HTML, CSS for frontend, Python for backend and SQL database. In this application every manager of organization could login and fill form for resource requirement for department. Then form automatically redirect to CEO, HR head, Finance head dashboard. Once they approved form then this form will redirect to recruiter.

- **Responsibilities:**

Developed the whole system.

Developed the Backend of the application, involved in the deployment process and direct client interaction..

Project:2

- **Tool/Technologies. :VBA, Python MailItemobject**

- **Project Synopsis**

- Process automation was generated that will run through the raw report, calculate employee increment as per HR rule and dynamically create separate excel sheet. Mail this file across to the department manager and employee automatically.

- **Responsibilities:**

Developed automation from scratch to end.

Involved in design, Coding and Unit Testing.
